ABSTRACT

... user, an overlapping area detecting part 187 obtains an area where videos photographed by a **first camera** part 100 and a **second camera** part 130 are overlapped. At the time of dividing a featured block, namely video, within the frame of video 1 photographed by means of the **first camera** part 100 and the **second camera** part 130 into blocks consisting of 16 pictures ×16 pixels, a feature point extracting...

... through the use of this feature point, a photographic parameter arithmetic part 169 compares the **size** and the perspective drawing of an **object** in video to calculate the photographic parameter of the part 130 from the **comparing** result.
